Thanks! Glad it is over (for now). I edited the responses in TCE with your suggestions and sent it forward. I also included the line in the email, in the TCE-specific section.

In terms of who commented, we have a table of waiver requests for each chemical with agree/disagree. I was thinking of doing a crosswalk, but it definitely would have taken some time. Hopefully ECRMD IO and OPPT IO see what it looks like without it. (OGC agreed to all the waivers but then were all over the documents!).

Hi Niva,

This is an impressive amount of work you've done shepherding the ABPs for RMB 1's solvents. I focused mainly on TCE and 1-BP, but reviewed them all.

Ex. 5 Deliberative Process (DP)

You should send the email. You did the work. Although let me know if you prefer I do it.

Thanks, Joel

Hi Joel -

I've finished adding the schedules and doing a little clean-up on the ABPs (NMP, PCE, TCE, 1-BP). The redline and clean versions are aligned. You should review the redlines and either make corresponding changes in the clean version, or discard the clean version and have ECRMD IO just review the redlines with the workgroup comments and responses. Up to you if you want to encourage ECRMD IO to comment in the redline or have the clean version start being the new version.

Next steps - Your review, ECRMD IO review, OPPT IO review, FAR-like process.

- I set up the links in the ECRMD management site so you can forward to ECRMD IO (they would not be able to access the original links in RMB1). I expanded the permissions so the teams will be able to access these files if needed to make edits. Links are at the very bottom of this email.
- I created a planner card but only assigned it to you and me. If you want to use it, you can add Sheila, Tanya, etc to assign it to them. Feel free to also not use the planner card! Links are already there. It is in the 'first 10' bucket
- When you send these forward, please include Cody and Judith also
- Note - TCE needs your review on some of the comment responses, and you should be aware of some of the specific comments. I flagged you in them, and you should also search for !!! to find additional flags from Katie. All the others have a lot fewer comments. After TCE, 1-BP is the most exciting.
